SOUTH WALES Argus

PETITION

"We, the undersigned, are protesting against the closure of **Orb Electrical Steels** plant in **Newport** where 380 people are employed. We believe that this site could, with a little investment have a prosperous future given the growth in demand for electric vehicles which will increase demand for the type of steel only the Orb can produce.

We call on the Government to work with Tata, invest in the plant and protect this strategically important business and the future of the UK electric vehicle supply chain''
